Electrical Economics in the Home.

"It is your own fault that your light bills are too high," remarked the electrical engineer.

Every night when you turn on your lights a monster called Absorption gumshoes into your house and steals eighty-five per cent of your light. The wall paper in this room is dark green, the woodwork is stained a chocolate brown and the furniture and furnishings are very dark. They all combine to steal away most of your light. You have to pay for the light your lamps actually give, but in reality you get only fifteen per cent of the light you pay for, because you are being systematically robbed by the wall paper and woodwork, the chair and rugs.

Soon after this the house was repainted in light buff tints and the woodwork was painted white. As a result of this change the electric light bills were cut in halves. Seventy five per cent of the candle power of each lamp was being utilized, consequently it took less than half the number of lamps to light the room.

Go into most any home and you will find some one following you about turning down or turning off the light, trying to economize on light and paying no attention to costly errors which make the light bills excessive.

## For His Sake

"My husband begged me to take Cardul," writes Matie L. Bishop, of Waverly, Va., "and for his sake I agreed to try it. Before I had taken a bottle, I felt better. Before taking Cardul I suffered terribly every month and had to go to bed until it wore off, but now I am all right."

## Take CARDUL

### The Woman's Tonic

You know Cardul will help you, because it has helped others who were in the same fix as you. It is not only a medicine for sick women, but a tonic for weak women.

Being made from mild, gentle, vegetable ingredients, it is perfectly harmless and has no bad after-effects.

Cardul can be relied upon to help you. Try it today. At all druggists.

As a rule light fixtures are stuck in any old place to suit the whims of the architects and the economics of the electrical contractor. Wall papers and paints are selected to please the eye instead of for their light reflecting qualities. Without delving into the horrors of wall paper color and design suffice it to say that if care were taken in this respect many a hard earned dollar would be saved on the monthly light bill. Cheap wall paper of a dark and gaudy hue is about the dearest thing any one can put into a room.

### SMOKE SIGNALS OF INDIANS

How the Redman Communicated With His People and Warned Them of Danger.

The traveler on the plains in the early days soon learned the significance of the spires of smoke that he sometimes saw rising from a distant ridge or hill and answered from a different direction. It was the signal used in rallying the warriors for an attack, or warning them for a retreat.

The Indian had a way of sending the smoke up in rings or puffs, knowing that such a smoke column would at once be noticed and understood as a signal, and not mistaken for the smoke of some camp fire. He made his rings by covering the little fire with his blanket for a moment and allowing the smoke to ascend, when he instantly covered the fire again. The column of ascending smoke had said to every Indian within thirty miles, "Beware! An enemy is in my rear!" Three smoke columns closed together meant "Danger." One smoke merely meant "Attention." Two smoke means "Camp at this place."

Frequently at night the settler or the traveler saw fiery lines crossing the sky, shooting up and falling, perhaps taking a direction diagonal to the lines of vision. He might guess that these were the signals of the Indians, but unless he were an old-timer he might not be able to interpret the signals. The old-timer and the squaw-man knew that one fire-arrow, an arrow prepared by treating the head of the shaft with gunpowder and fine bark, meant the same as three columns of smoke puffs. "An enemy is near." Two arrows meant "Danger," three arrows, "The danger is great." Several arrows indicated, "The enemy is too powerful for me."

The Semi-Weekly Bee is adding to its subscription list daily. The people now know a good thing when they see it and there is no better hold of the many business propositions THE Bee is now offering. One man said: "What is the use to pay a dollar for a granite ware teakettle, dishpan or water pail when you can get one for 50 cents by subscribing for THE Bee?" And he is right about it.

## "IF YOU SEE IT IN OUR AD IT IS SO"

The above is the familiar slogan that has greeted the readers of our advertisements for a long time.

We have always lived squarely up to this business slogan, but it has never been so forcefully demonstrated or better brought before the people as now, when we are making the final settlement on the 1908 Warehouse Receipts.

A year and a half ago, when we advertised that we would take the Farmers' Warehouse Receipts in payment for merchandise, and would give in merchandise every penny that the Association paid, we meant just what we said.

Last May when the Association made a partial payment, we advertised that we would pay in merchandise all that was due on each Receipt, and we meant just what we said.

Out of over one thousand farmers of Hopkins and Webster counties, whose Receipts we held, only a small percent came in for this partial settlement, thus showing an increased confidence in our straightforward way of dealing with them, by leaving this balance with us until the final settlement.

We very deeply appreciate this confidence reposed in us by so many substantial citizens, and if Fair Dealing and Honest Business Methods will do it, we propose to continue these intimate business relations thus established.

Our store is well stocked for the Fall and Winter with new and desirable merchandise, and we desire to have the opportunity of showing nearly every one who comes to Madisonville before they make their purchases.

Let our store be your store.

When you seek the best merchandise values, seek us.

"So," said the judge, "you say that you never went to Chicago from Huntington. Now, this is a very important point in the case, and I give you one more chance to explain, for you and Snyder were seen on the same train. Now, be precise."

"No, sir; I never went to Chicago."

"Did you say 'go'?"

"And you were with him. Now, out with it?"

"Yes, sir," answered the witness after a pause. "You see, I told the truth, because this was the way we sat opposite each other. I am not a liar."

"I didn't go to Chicago. I went back away from Huntington." — Woman's Home Companion.

Soft Bedded Shirts.

She was a dear old lady, but she lived at Hardscrabble and was a bit behind times. She had been reading the advertisements in a city newspaper chapter and brought her way,

"Father?" she asked her husband, "what is these here negligee shirts they talk about?"

Father, being a man, was equal to the occasion.

"Don't know what they be?" he grumbled. "Well, you got a back number. Neglige shirt ain't a shirt—it's a dress and choke as a bird's bill—means a regular hard biled shirt. A negligee shirt is somethin' you might call a soft biled shirt." — Woman's Home Companion.

Dr. Seizer, she will have complete use of it.

To the man who prints THE BEE: Did you ever have chills? If not, why not? Should you want a few we can supply you. We would be willing to try to get along without any at all to accommodate a friend.

A man who never had the chills does not know how good he feels when he gets well.

While engaged in sinking a well for Dr. Ferguson, something goes wrong with the machinery and broke a large cast wheel into less than a hundred pieces, we suppose.

As we did not stay to count them, as we had urgent business in the cellar, we hastily retired and remained until things got quiet and quit raining pieces of casting.

#### The Hole in the Coal Bin.

Heat, the scientist tell us, is but a form of energy consisting of rapid and free vibrations among the molecules of matter. Whether this accepted theory be true or not, the average householder is ready to swear that the heat supply in the modern home is the result of untold energy represented by the dollar which vibrates through the pocketbook to the coal man.

Fuel for heating the house and cooking the food is a very costly item in the course of a year. Coal costs about \$1 a ton in many places, and any hints which will help to get the most heat out of this precious material meet with the instant approval of every householder.

Let us first put on trial that black, iron tentacle octopus in the basement!

The appetite of the average house furnace would make a cannibal chief, ready to dine off the fat lady of the circus, die of envy. Coal thrown into its yawning red maw produces nothing but ashes and backache. All the average man knows about a hot air furnace is that hot air rises, and when it refuses to do this natural phenomenon has only resources in perspiration, profanity and more coal. But there was a man one day who reasoned that the fire was not at fault and fell to cursing the hot air flies. In the end he resolved to make them draw, whether or no, so he purchased a small electric fan for about \$10, cut a hole in the cold air shaft, put the fan inside and started it going. The result was that the fan forced the hot air through the pipes in a fine circulation and the house was soon warm. Now, whenever the furnace does not work properly, he does not waste his coal but presses a button and the fan does the trick.

### 'LIZA MARY JANE O'CONNERS.

'Liza Mary Jane O'Connors Graduated with high honors; She mastered the curriculum; Also the art of chewing gum, Mathematics never foisted her, And metaphysics always pleased her.

The science and languages— She dreamed about them, so she says.

And never owned to feeling glum About the time she is full of the disease germs.

Her men tutors could not resist; In fact, she had such winning ways She skipped examination days!

And did exactly as she chose And wore to school her Sunday clothes.

Of knowledge crammed she knew a lot,

But always used her well-worn trot, And always stirred up a sensation By handing in correct translation.

At last 'mid strains of music rare,

She lightly tripped the roisterous star

And took her sheepskin tied with ribbon.

Although she did some frightful "orribbin".

But now she's duly graduated! And Nineteen Ten her "skin" is dated.

Ah, soon she'll hang it on the wall, And when her friends, perchance, shall call,

They'll read within a jaded frame Her some what ultra classic name.

## "TOOTING - OUR - OWN - HORN"

If we don't "toot our own horn" occasionally as we pass through this old world no one else will tool it for us, so here goes:

We wish to call your attention to the kind of a semi-weekly we are getting out, and also to the fact that your name should be on our list if not already there. We want you to examine the Semi-Weekly Bee this week, or any other week for that matter, and compare it with any other county paper of its size and see if it does not compare favorably as to local news, upholding morality and supporting every laudable and legitimate enterprise in the upbuilding of the town and county.

We give you 104 papers a year for one dollar, and we try to give you a good, clean paper full of short, crisp news items and some advertising, all of which is reliable.

The Semi-Weekly Bee is a busy bee and hums in the hive of industry. If you are not a subscriber, we would like to have you join us before the 1st of November, and we will give you a ticket entitling you to a chance on the \$30 Hoosier Kitchen Cabinet to be given away on that date.

By paying only 50 cents extra you get a triple coated piece of blue and white granite ware or one of Roosevelt's Thrilling Experiences in the Wilds of Africa, worth \$1.50. To every one who is in arrears \$2.50 or more, we give one ticket on the cabinet for every dollar paid and the book or granite ware free. Come to the office and examine these premiums. They are good value and they are here for you. If you do not get one it is not our fault.
